

HIGH VOLTAGE

TRANSMISSION SERVICES

***OVERHEAD AND
UNDERGROUND SYSTEMS***

Hot Line Construction provides installation, removal and maintenance services for high voltage overhead and underground transmission projects.

HIGH VOLTAGE

TRANSMISSION SERVICES

OUR TRANSMISSION CAPABILITIES INCLUDE:

- Overhead and underground facilities from 60kV to 500kV
- Wood and steel pole construction
- Tower raising
- Underground cable installation, maintenance and related cable splicing

Challenging transmission projects are our specialty. Our experience with helicopter-aided construction makes us the go-to company for projects in remote locations and environmentally sensitive areas.

Hot Line works safely to deliver results on schedule and within budget while complying with all state and federal agency permit and regulation requirements.
